Applicant: Sweet Haven Farms LLC

Property Address: 7189 Alleghany Road

Zoning District: Commercial (C) and Agricultural-Residential (AR)

Request: Special Use Permit – Contractor's Yard with Accessory Material Processing

Dear Members of the Planning Board,

I am respectfully requesting approval of a Special Use Permit to establish a contractor's yard at the above-referenced property, which includes portions zoned Commercial (C) and Agricultural-Residential (AR) within the Town of Alabama.

The proposed contractor's yard and all associated operational activities will be located within the Commercially and Agricultural Residential zoned portion of the property. The Agricultural-Residential portion of the parcel will remain undeveloped or used in a manner consistent with its zoning classification and will serve as a natural buffer between the proposed operations and any surrounding properties.

The primary purpose of the site will be to support my excavation and construction business operations, including the storage of equipment such as excavators, trucks, and related materials.

In addition, I am proposing the following accessory uses to support my operations:

- Topsoil screening, limited to clean, uncontaminated material generated from my own projects and conducted on an intermittent basis
- A portable concrete batch plant, to be used on a temporary and as-needed basis to supply concrete for local construction projects. This equipment will not operate continuously and is not intended as a permanent high-volume production facility

To ensure compatibility with surrounding properties, the following measures are proposed:

- Preservation of the Agricultural-Residential area as a buffer zone
 - Clearly defined areas for equipment storage, material stockpiles, screening, and batching operations
 - Hours of operation limited to [e.g., 7:00 AM – 6:00 PM, Monday–Saturday], with batching activities restricted to daytime hours
 - Dust control measures, including water application and proper handling of cement materials
 - Use of modern, portable equipment designed to minimize noise and emissions
 - Installation of perimeter screening, including berms, fencing, and/or landscaping to reduce visual and noise impacts
 - Stabilized entrance and internal drive surfaces to prevent tracking of mud and debris onto public roads
 - Proper stormwater management practices, including designated concrete washout areas
-

- Compliance with all applicable New York State Department of Environmental Conservation (NYSDEC) requirements

The site has been selected based on its Commercial and Agricultural zoning designations and its suitability for contractor operations, with appropriate buffering and site controls in place. All accessory activities will remain subordinate to the primary use of the property as a contractor's yard.

I appreciate your consideration and look forward to working with the Planning Board to ensure this project meets all Town requirements.

Sincerely,

Drew Klotzbach
